(54) Title: METHOD AND APPARATUS FOR DATA LOGGING

(57) Abstract: There is described a data logging method for transferring log data to a server over a wireless network from a plurality of remote devices, said server for receiving data from the plurality of said devices, said method comprising the following steps: scheduling a transfer period for transferring log data from a device to the server taking into account the wireless network signal strength of the device for the scheduled transfer period whereby the scheduled transfer period does not overlap a time when the estimated wireless network strength is too low to transfer the log data; and transferring data determined by its respective transfer period in the schedule.
